

Summary: Senior Product Designer | 6+ years designing consumer mobile and B2B SaaS products, improving conversion, engagement, and adoption through user research, interaction design, and rapid prototyping.

UX / PRODUCT EXPERIENCE

Klaviyo (AI Powered CDP & CRM for B2C Marketing) Boston, MA (Remote)
Oct 2021 - Aug 2025
Product Designer
Designed data infrastructure and AI tools for marketers to operationalize customer data across automation workflows and multichannel campaigns.

AI Insights: Designed an AI driven feature that synthesized complex customer data into clear growth opportunities, replacing hours of manual analysis and expert support.

- Clarified prioritization by establishing revenue as a system metric across opportunities, driving an 18% lift in Klaviyo attributed revenue for adopting accounts.
- Accelerated opportunity selection through AI ranked recommendations with clear, configurable next steps, cutting time to action by approximately 40% (5 to 3 days).
- Built trust in AI output by creating evidence views that exposed the customer data behind each recommendation, reaching 32% account adoption.

Data Deduplication Tooling: Led design of an AI driven system that detected and resolved duplicate customer profiles across Klaviyo's data infrastructure, improving accuracy and reducing operational inefficiencies at scale.

- Reduced manual cleanup by automating duplicate detection across customer profiles, raising data quality scores by 28% and cutting related support tickets by 35%.
- Strengthened confidence in merges by designing a review interface that compared matching profile properties alongside AI confidence scores, contributing to a 15 point NPS increase.
- Sharpened customer targeting by feeding cleaner profile data into segmentation, lifting campaign engagement by 8% and conversion rates by 2%.

Customer Profile Redesign: Led the end-to-end modernization of a legacy core product (untouched since 2012), restructuring the information architecture to align with marketer workflows.

- Accelerated issue resolution by prioritizing consent status, activity logs, and event history in a restructured layout, reducing time to resolution by 30% and support burden by approximately 25%.
- Transformed a planned 1:1 technical migration into a redesign of core workflows by shaping the long term roadmap vision with PMs, EMs, and the GPM.
- Standardized patterns for displaying and managing customer data, translating the Profiles redesign into 12 reusable design-system components for future enterprise workflows.

TruckBux (Mobile Ordering & Food Delivery App) Austin, TX
Jun 2018 - Jun 2021
Founding Product Designer
Designed the consumer mobile ordering experience, vendor app, and internal admin tools for a ghost kitchen marketplace serving 50+ vendors and processing 10,000 monthly orders.

- Recovered lost sales at checkout by redesigning the payment flow with saved methods alongside a Stripe migration, reducing abandonment by 40% and lifting payment success to 95%.
- Grew revenue per order by embedding upsell moments and personalized recommendations into menu customization, increasing average order value by 25%.
- Cut support load by designing real time order tracking and self serve modification workflows, decreasing order related tickets by 30%.

EDUCATION

HARRISBURG UNIVERSITY OF SCIENCE AND TECHNOLOGY Harrisburg, PA
2024-2026
Master of Science in Techpreneurship, GPA: 3.8

DREXEL UNIVERSITY Philadelphia, PA
2017-2021
Bachelor of Science in Interactive Digital Media, GPA: 3.8

SKILLS

Design & Methods: End-to-End Product Design, Mobile App Design, Interaction & Visual Design, User Research, Usability Testing, Rapid Prototyping, Information Architecture, Design Systems.
Product Focus: Consumer Commerce, Conversion Optimization, Personalized Recommendations, Product Adoption & Engagement, Two-Sided Marketplaces.
Tools & Technologies: Figma, Adobe Creative Suite, Amplitude, Google Analytics, HTML/CSS/JS, Cursor, Claude.
