

UX / PRODUCT EXPERIENCE

Klaviyo (AI Powered CDP & CRM for B2C Marketing)

Boston, MA (Remote)

Designed data infrastructure and AI tools for marketers to operationalize customer data across automation workflows and multichannel campaigns.

Product Designer II

Feb 2023 - Aug 2025

AI Insights: Designed an AI driven feature that synthesized complex customer data into clear growth opportunities, replacing hours of manual analysis and expert support.

- Clarified prioritization by establishing revenue as a system metric across opportunities, driving an 18% lift in Klaviyo attributed revenue for adopting accounts.
- Accelerated opportunity selection through AI ranked recommendations with clear, configurable next steps, cutting time to action by approximately 37% (5.1 to 3.2 days).
- Built trust in AI output by creating evidence views that exposed the customer data behind each recommendation, reaching 32% account adoption.

Data Deduplication Tooling: Led design of an AI driven system that detected and resolved duplicate and bot customer profiles across Klaviyo's data infrastructure, improving data quality and reducing operational inefficiencies at scale.

- Accelerated manual review by designing an automated detection workflow, cutting time on task from 15 minutes to about 30 seconds per profile.
- Raised data quality scores by 28% by removing 1.2M duplicate and bot profiles, while cutting related support tickets by 35%.
- Strengthened confidence in merges by designing a review interface that compared matching profile properties alongside AI confidence scores, contributing to a 15 point NPS increase.

Product Designer

Oct 2021 - Feb 2023

Customer Profile Redesign: Led the end-to-end modernization of a legacy core product (untouched since 2012), restructuring the information architecture to align with marketer workflows.

- Accelerated issue resolution by prioritizing consent status, activity logs, and event history in a restructured layout, reducing time to resolution by 30% and support burden by approximately 23%.
- Transformed a planned 1:1 technical migration into a redesign of core workflows by shaping the long term roadmap vision with PMs, EMs, and the GPM.
- Standardized patterns for displaying and managing customer data, translating the Profiles redesign into 12 reusable design-system components for future enterprise workflows.

TruckBux (Mobile Ordering & Food Marketplace App)

Austin, TX

Founding Product Designer Jun 2020 - Jun 2021

Architected the zero to one experience across a User App, Vendor App, and Internal Admin Panel for a venture backed food marketplace, supporting 50+ vendors and 10,000 monthly orders.

- Partnered with founders on product vision and investor materials, helping close a \$600K seed round at a \$6M valuation cap.
- Recovered lost sales at checkout by redesigning the payment flow with saved methods alongside a Stripe migration, reducing abandonment by 40%.
- Grew revenue per order by embedding upsell moments and personalized recommendations into menu customization, increasing average order value by 25%.
- Cut support load by designing real time order tracking and self serve modification workflows, decreasing order related tickets by 30%.
- Streamlined vendor operations by designing order management workflows for operators running multiple kitchen brands across locations.

EDUCATION

HARRISBURG UNIVERSITY OF SCIENCE AND TECHNOLOGY

Harrisburg, PA

Master of Science in Techpreneurship, GPA: 3.8 (Full time from Sep 2025) Aug 2024 - Aug 2026

DREXEL UNIVERSITY

Philadelphia, PA

Bachelor of Science in Interactive Digital Media, GPA: 3.8 Sept 2017-2021

SKILLS

- Design:** Product Strategy, User Research & Usability Testing, Information Architecture, Interaction & Visual Design, Design Systems, Data Visualization
- AI & Prototyping:** Claude, ChatGPT, Cursor, Framer, Rive, Spline, Lottie
- Tools:** Figma, Adobe Creative Suite, After Effects, Amplitude, Google Analytics, SQL
- Industry Focus:** Enterprise B2B SaaS, AI & Agentic Experiences, CRM & Data Infrastructure, Marketplaces, Consumer Mobile
