Summary: Product Designer with 6+ years designing complex B2B ecosystems, in CRM & CDP. AI-first in practice, using LLMs and coded prototypes to validate direction before engineering commits. Experienced in leading end-to-end product strategy.

UX / PRODUCT EXPERIENCE

Klaviyo (AI-Powered CDP & CRM for B2C Marketing)

Product Designer

2021 - 2025

Lead designer for core data management and predictive analytics tools, enabling enterprise customers to maximize revenue through automated insights. 3 projects highlighted below:

AI-Insights: Predictive dashboard turning account data into ranked, one-click revenue opportunities.

- Reframed performance around predicted revenue, moving the product from reactive monitoring to proactive guidance; testing showed probability ranges built more trust than precise values.
- Designed the Action Sheet pattern so marketers launch a recommended campaign without leaving the insight, cutting time from insight to launch from 5.1 days to 3.2.
- Scaled to 32% of eligible accounts and 6.5K weekly views, lifting NPS +13 and attributed value 18% among \$50K+ ARR customers.

Data Deduplication Tooling: Designed an AI-driven system to detect and resolve duplicate profiles across the data infrastructure, improving accuracy and reducing operational inefficiencies at scale.

- Boosted overall **data quality scores by 28%** by automating duplicate detection and **reduced support tickets by 35%**.
- **Drove a 15-point NPS increase** for data management features by introducing AI confidence scoring and explainability UI.
- Cut customer costs by 24%, worth \$2.4M annualized, by removing 1.2M bot profiles and reaching 88% adoption across eligible enterprise accounts.

Customer Profile Redesign: Led the end-to-end modernization of a legacy core product (untouched since 2012), restructuring the information architecture to align with marketer workflows.

- **Reduced time-to-resolution by 30%** and **decreased the overall support burden by ~25%** by prioritizing critical data like consent status and activity logs.
- **Drove a 12-point NPS increase and a 23% reduction in profile-related support tickets** by improving usability and performance.
- Established scalable patterns for data-dense interfaces, **contributing 12 new components to the Design System** to accelerate future enterprise feature development.

TruckBux (B2C Mobile Ordering & Food Delivery App)

Founding Product Designer

2020 - 2021

Architected the 0-to-1 consumer mobile experience for a dual-sided marketplace, embedding strategic upsell moments into complex, conditional menu customization workflows and location-based discovery.

- Maximized checkout conversion, reducing order abandonment by 40%, by designing a friction-free flow with saved payment methods.
- Expanded revenue per user, increasing Average Order Value (AOV) by 25%, by embedding strategic upsell loops and personalized recommendations into the ordering journey.
- Partnered with founders on product vision and brand, supporting a \$600K seed raise through prototypes and pitch materials.

EDUCATION

Drexel University - B.S in Interactive Digital Media

2017-2021

GPA: 3.83 | Concentration: Web development, UX Research and UX Design | Honors student

Harrisburg University of Science and Technology - M.S in Techpreneurship

2024-2026

GPA: 3.8 | Concentration: Human Computer Interaction Design, Project Management

ADDITIONAL INFORMATION

Skills: End-to-End Product Design, User Research & Usability Testing, Information Architecture, Rapid Prototyping, Wireframing, Journey Mapping, Heuristic Evaluation, Competitive Analysis. AI Workflow: Claude, ChatGPT, Cursor. Problem framing, PRD drafting, edge case discovery, and coded prototypes ahead of engineering commitment. Tools: Figma, Adobe Creative Suite, Amplitude, Google Analytics, SQL, HTML/CSS/JS, Design Systems. Industry: Enterprise B2B SaaS, Complex Data Visualization, CRM & Internal Tooling.
